The Duke Water Network (DWN) is a student organization that connects students with alumni and professionals in the water resources sector. DWN hosts networking events, off-campus trips, talks, panels, and movie screenings that provide opportunities for students to network with water industry professionals and gain job-related insights that supplement the academic nature of the MEM program.

If you are a WRM or interested in working on water resources issues, DWN is the club for you!

To find out about our upcoming events, join our:
