Duke University’s professional master’s programs combine academics with an emphasis on practical, skills-based instruction in environmental management, science and policy to train a new breed of environmental leader. With eight concentrations to choose from, plus opportunities to earn a professional MEM or SAF-accredited MF degree concurrently with a master’s degree in business, law, public policy, engineering or education, you can tailor an individualized program that prepares you for leadership in the corporate, nonprofit, government or consulting sector.

If you are a practicing environmental professional with at least five years of experience, there is the two-year Duke Environmental Leadership online MEM degree program. It allows working professionals from all disciplines to pursue a MEM degree in environmental leadership while continuing to work.

**ENVIRONMENTAL MANAGEMENT (MEM) DEGREE**

**MASTER OF FORESTRY (MF) DEGREE**

**DUKE ENVIRONMENTAL LEADERSHIP (ONLINE MEM) DEGREE**

**STATE-OF-THE-ART RESOURCES + FACILITIES**

**ALUMNI**

**ESI WATERS MEM’13**

Corporate Sustainability Manager, Norfolk Southern Corp.

“I enjoyed my time at the Nicholas School because of all the contacts and internship opportunities I gained. The best resource at the Nicholas School is hands down, the Career Services department. Through them, I got an incredible opportunity at Ocean Spray.”

**ERIN FULTON MEM/MF’12**

Program Manager, Alaska Sustainable Fisheries Trust

“The curriculum allows students to approach environmental science and the current issues surrounding the environment from myriad angles - be it economics, policy, empirical science, etc. Encouraging this broader vision has been very beneficial to my work here in Southeast Alaska.”

**BRIAN HOLLY DEL-MEM’11**

Vice President and Senior Ecologist, BioResource Consultants, Inc.

“The Nicholas School helped me advance to the next level in my career because I gained a greater understanding of environmental issues, became a more effective leader, and was exposed to an extensive network of environmental professionals.”

**YOU WILL GRADUATE WITH**

- The skills & knowledge to LEAD solutions
- A strategically focused toolkit
- The ability to work collaboratively in teams
- A multi-faceted lens to address today's environmental complexities

Business and Environment
