

DUKE UNIVERSITY

NICHOLAS SCHOOL OF THE ENVIRONMENT

MORE THAN A DEGREE, A PURPOSE

ENVIRONMENTAL MANAGEMENT (MEM) DEGREE

MASTER OF **FORESTRY** (MF) DEGREE

DUKE ENVIRONMENTAL LEADERSHIP
(ONLINE MEM) DEGREE

Duke Environment brings together bright, talented and ambitious people from across the globe whose interests vary from conservation to corporate sustainability and everything in between. With seven on-campus MEM concentrations to choose from, plus opportunities to earn a professional **MEM or SAF-accredited MF degree** concurrently with a master's degree in business, law, public policy, engineering, or education, you will have the ideal exploratory platform for pursuing an impactful and rewarding career. Our students graduate as leaders—capable of affecting change, spurring innovation and inspiring others to action.

STATE-OF-THE-ART RESOURCES + FACILITIES

ENVIRONMENT HALL + LSRC
DURHAM, NC

DUKE FOREST
DURHAM, NC

DUKE MARINE LAB
BEAUFORT, NC

If you are a working professional with at least five years of environmentally-related experience, there is the two-year **Duke Environmental Leadership online MEM degree**. This program's flexible structure allows students to develop a highly transferrable leadership-driven skill set in a manner that is both convenient and efficient.

ALUMNI

CRISTINA VILLANUEVA
MEM'10

Sr. Manager, Mexico Oceans
Strategic Growth and Partnerships,
Environmental Defense Fund

"The Nicholas School had a significant impact on my career. I was well prepared to understand challenges in Mexican fisheries and help design solutions. I believe attending the Nicholas School has been one of the most powerful investments of my time."

LAUREN FETY
MEM/MF'14

Forest Analyst,
The Conservation Fund

"I relished the interdisciplinary thinking at the Nicholas School when I was a student, and being able to consider forests from many perspectives has been extremely valuable professionally. From ecological theory to geospatial analysis, the classes I took directly shape my work in forestry."

SIDNEY MCLAURIN
MEM/MBA'17

Regional General
Manager, Lime

"I came into the Nicholas School with the naive impression that many environmental issues we face had a "good" and a "bad" actor. My experiences in the classroom and with my peers challenged this belief, enabling me to develop a deeper understanding of the complexities involved in humans' relationship with the environment."

YOU WILL GRADUATE WITH

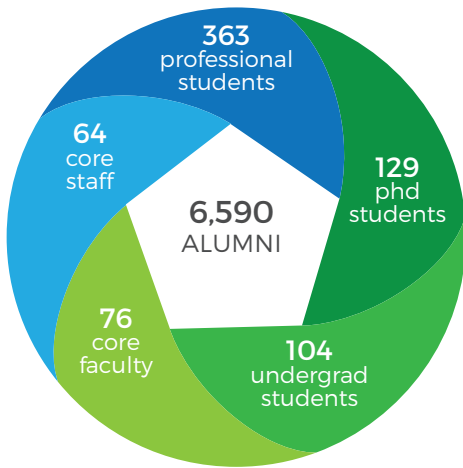

In-demand and
transferrable
skills to pursue
